Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points ...

Denver-based Peak Energy has announced a multi-year phased agreement with Jupiter Power, a US grid-scale battery storage developer and ...

Sodium-ion battery energy storage system (BESS) startup Peak Energy has launched and shipped its first sodium-ion BESS to be deployed in a ...

Peak Energy, a Denver-based battery manufacturer, announced today the launch of the first grid-scale sodium-ion pyrophosphate (NFPP) ...

Sodium-ion's debut in American grid storage marks a significant step forward, but widespread adoption is far from guaranteed. The technology shows promising advantages for ...

Peak Energy has signed a multi-year agreement with Jupiter Power, one of the leading U.S. developers and operators of large-scale energy storage, ...

Under the terms of the phased agreement, Peak Energy will supply up to 4.75 GWh of its sodium-ion battery energy storage systems (ESS). These ...

Peak Energy debuts the US's first grid-scale sodium-ion battery, cutting costs and boosting reliability with passive cooling tech.

Under its agreement with Texas-based energy provider Jupiter Power, Peak Energy will provide 4.75 gigawatt-hours of sodium-ion battery energy storage systems (ESS) for deployment between...
