C& D experts with extensive knowledge of data center uninterruptible power supply (UPS) are ready to help you configure your backup system. Let us help you ...

This paper presents an overview of the case for the application of 380 Vdc as a vehicle for optimization and simplification of the critical electrical system in the modern data center.

With advanced BMS intelligence for precise State of Charge (SoC) and State of Health (SoH) tracking, these battery cabinets simplify installation, reduce ...

This easy to install cabinet adds one or two 48 Volt battery strings and up to a 200AH battery. It seamlessly abuts your existing cabinets and its compact ...

Alpine Power Systems engineers and builds customized battery cabinets and enclosures for critical power applications, for utility, telecom, CATV, data center and other applications.

The battery cabinets are available in five different mechanical dimensions. They can facilitate multiple combinations of batteries, up to 63 battery blocks, connected in series and parallel configurations ...

Engineered for use with most type of battery terminal models, these cabinets can fit a wide variety of applications. This solution is completely customizable and flexible to support your application ...

They are ideally suited for High Capacity Battery Storage, delivering reliable power backup in demanding settings such as manufacturing plants, data ...

Explore Exide's SOLITION Data Center battery systems, engineered for high reliability, fast response, and secure backup power in critical IT infrastructures.

380V Data Center Battery Cabinets for Remote Areas

Designed for data center and critical applications, the External Battery Cabinet (EBC) can be used in conjunction with compatible UPS systems to provide prolonged system runtime during power ...
