Indian Institute of Technology Roorkee has signed a Memorandum of Understanding (MoU) with MaxVolt Energy to collaborate on the development of Artificial Intelligence (AI)-driven Battery ...

BMS and SOC Development for Electric Vehicles The development of a Battery Management System (BMS) and State of Charge (SoC) in Electric Vehicles would entail designing intelligent control ...

MaxVolt Energy partners with IIT Roorkee to develop AI-powered Battery Management Systems for EVs and energy storage.

MaxVolt partners with IIT Roorkee to develop AI-driven battery management systems for advanced energy storage and EV solutions.

This review highlights the significance of battery management systems (BMSs) in EVs and renewable energy storage systems, with detailed insights into voltage and current monitoring, ...

How will BMS technology change the future of battery management? As the demand for electric vehicles (EVs), energy storage systems (ESS), and renewable energy solutions grows, BMS technology will ...

MaxVolt Energy enters into a strategic research collaboration with the Indian Institute of Technology Roorkee. The MoU signed between the organisations aims at developing advanced AI ...

The MoU signed between the organisations aims at developing advanced AI-driven Battery Management Systems for advanced energy storage and electric mobility solutions. The partnership ...
