characteristicsMarket development and deploymentA battery energy storage system (BESS), battery storage  
power station, battery energy grid storage (BEGS) or battery grid storage is a type of energy storage  
technology that uses a group of batteries in the grid to store electrical energy. Battery storage is the fastest  
responding dispatchable source of power on electric grids, and it is used to stabilise those grids, as battery  
storage can transition from standby to full power in u...
