This initiative aims to expand energy access across Africa while supporting Chad's transition to renewable energy. The financing includes EUR20 ...

Scientists developed a reusable liquid that captures and stores solar energy as heat, offering a battery-free alternative for heating and more.

While solar has been identified as the main technology to assist with Chad's electricity transition, thanks to the country's abundant sunlight, the Chad Connection 2030 plan also targets the ...

Heating accounts for nearly half of the global energy demand, and two-thirds of that is met by burning fossil fuels like natural gas, oil, and coal. Solar energy is a possible alternative, but ...

A DNA-inspired liquid stores solar energy for months, releasing it as heat on demand.

The solar plants are expected to generate 61 gigawatt-hours of clean, reliable, and affordable energy each year responding to Chad's energy deficit. This will reduce carbon dioxide ...

In rural regions, the deployment of standalone solar systems has supplied clean and dependable energy to numerous households, thereby decreasing ...

In 2025, Chad inaugurated its second utility-scale solar plant, Noor Chad (50 MWp) with battery storage, designed to supply power to about ...

While solar has been identified as the main technology to assist with Chad's electricity transition, thanks to the country's abundant sunlight, the Chad ...
