Chile has emerged as a global pioneer in adopting high-temperature heat storage systems, particularly for solar power plants. With its Atacama Desert boasting the highest solar radiation ...

The strategy focuses on developing production in areas with abundant renewable resources, leveraging the same solar and wind power that is driving the storage boom. The ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and ...

Solar and energy storage deployment is booming in Chile, spurred on by supportive government policy that has been markedly stable for 15 years. Indeed, the nation leads Latin ...

A new 2,036 MWh battery complex in Chile validates the economic model for using solar-plus-storage to ...

Chinese companies have in recent years built, or announced plans to build, Chile's longest power line, solar ...

By enabling the storage of solar energy for up to five hours, Andes Solar II-B provides firm power even after sunset, effectively addressing one of the key challenges of solar energy integration.

Global renewable energy firm Sonnedix has filed a new environmental impact statement (EIS) for its 150-MWp Tres Cruces solar project in Chile's Atacama region after ...

Chile's renewable energy sector is facing significant operational challenges as the curtailment of solar photovoltaic (PV) and wind generation surpassed 6TWh in 2025, marking ...

Hybrid renewable and battery storage projects are particularly important to providing more stable and lower carbon power supply in ...
