-----

Chinese scientists have announced a plan to build an enormous, 0.6 mile (1 kilometer) wide solar power station in space that ...

China has unveiled the world's first dual-tower solar thermal power station in the Gobi Desert, using 27,000 mirrors to generate ...

China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang.

China is currently planning to build a gigantic solar power ...

Companies like Space Solar are devoted to transforming the bold vision of space-based solar power into a tangible, revolutionary ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest ...

China's SDIC subsidiary commissioned a 1 GW photovoltaic plant on the Yalong River in Sichuan, making it the world's third-highest-altitude PV facility at 4,600 m. The project ...

The massive growth in wind and solar begs the question: why is China still building coal power plants and, by most analyses, way more than it actually needs? The answer is ...

China is pushing the boundaries of renewable energy with its ambitious plan to build kilometer-wide space solar stations that will beam ...
