China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang.

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

The debate on how to solve China's solar problem is heating up. The China Photovoltaic Industry Association warns local governments ploughing ...

The rapid growth of China's solar sector from 2023 to 2024 has strained critical resources, including financial capital, grid capacity, and ...

China Solar PV News Snippets: LONGi Modules Power China's Largest BC Solar Plant & More China residential PV up 56% in 2025; GCL Tech subsidiary plans 400,000-tonne LFP cathode ...

OverviewSolar photovoltaicsHistorySolar resourcesConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesAs of at least 2024, China has one third of the world's installed solar panel capacity and is the largest domestic market for solar panels. A large part of the solar power capacity installed in China is in the form of large PV power plants in the west of the country, an area much less populated than the eastern part but with better solar resources and available land.

This report offers detailed insights into China's PV landscape, highlighting record-breaking growth and technological leadership in the global renewable energy ...

The continent imported 60% more solar panels from China over the past year, though a lack of reliable installation data makes it a challenge to track ...
