When you connect solar panels in parallel, the total output voltage of the solar array is the same as the voltage of a single panel, while the total output current is a sum of the currents passing through each ...

What Is A Solar Photovoltaic array?Series Connection of ModulesParallel Connection of ModulesSeries - Parallel Connection of Modules- Mixed CombinationSometimes to increase the power of the solar PV system, instead of increasing the voltage by connecting modules in series the current is increased by connecting modules in parallel. The current in the parallel combination of the PV modules array is the sum of individual currents of the modules. The voltage in the parallel combination of the modules...See more on electricaltechnology
