Here you'll find news and features about the various kinds of microgrids: commercial, remote, military, campus, data center, community, industrial, residential, critical infrastructure and utility microgrids.

Therefore, this chapter provides an overview regarding some of the laboratorial infrastructures and pilot sites dedicated to development of MG and SG concepts. Additionally, it is ...

GIG is a leader in creating control and optimization solutions and demonstrating these solutions in real-world vehicle-grid and microgrid applications that reveal ...

The work began in 2008 as a project to install a high-efficiency, 100% renewable energy-powered, single-building microgrid. Since then, the project has expanded into an installation-wide ...

This pilot demonstration project was hosted by EPRI to demonstrate how the SPIDER testbed can be used to validate microgrid controls and to showcase New Sun Road's AI-based controls.

The Energy Department has a comprehensive portfolio of activities that focuses on the development and implementation of microgrids to further...

Pilot demonstration of advanced technologies for Microgrid using distributed energy resources is key to meet the clean energy goals around the ...

To deal with this problem, this research first reviews the real-world and simulation cases of zero-carbon microgrids in recent years and classifies them into two categories, i.e., on-grid mode ...

This demonstration home by SoCalGas is a first of its kind, using solar, storage, an electrolyzer, and the Generac ARC microgrid controller to convert solar energy to hydrogen.

Demonstration projects and applications of microgrids

Together, the lessons and best practices from the seven EPIC-funded microgrid demonstration projects reflect considerable knowledge and experience gained by project participants.
