It's a common misconception that using solar power means you are no longer tied to the power grid. In fact, most solar installations -- whether agricultural, commercial, or residential --- ...

Does excess power from a home solar panel system flow back into the grid? The short answer is it could, but a home's solar panel system doesn't ...

So why does your home need power from the grid after solar ...

Tons of green energy projects, both wind and solar, want to connect to the grid. But they're running into a surprising obstacle.

While off-grid and grid-tied solar systems have distinct differences, the best option for you depends on your specific circumstances. Off-grid ...

Larger renewable plants, like solar and wind farms, are increasingly required to participate in primary frequency response, injecting power into the ...

To meet the growing demand for renewable energy, the world may need to integrate RES into power grids--but there are hurdles to overcome. ...

Unlike off-grid systems that require expensive battery storage, grid-tied systems connect directly to your local utility grid, allowing you to generate ...

Kicking your utility to the curb sounds like a great deal, but it's more difficult than it sounds. Here's what it takes to go off the grid with solar panels.
