Despite tariffs and interconnection issues in the supply chain, the US energy storage market is still seeing record-breaking growth.

The following resources provide information on a broad range of storage technologies.

Driven by renewable energy integration and grid modernization, this report analyzes market trends, key players (e.g., Kokam, Saft, ABB), and ...

Batteries accounted for 53.84% of the 2025 energy storage market size, anchored by LFP and growing sodium-ion volumes, while hydrogen ...

The lack of a domestic rechargeable battery cell supply chain is not a risk only for the military. The early months of the COVID-19 pandemic saw disruptions to battery shipments for private-sector storage ...

We look at the reasons for, and implications of, the increasing convergence to the 20-foot, 5MWh container as the dominant grid-scale BESS ...

However, the recent years of the COVID-19 pandemic have given rise to the energy crisis in various industrial and technology sectors. An integrated survey of energy storage technology ...

The CATL electrochemical energy storage system has the functions of capacity increasing and expansion, backup power supply, etc. It can adopt more renewable energy in power transmission ...
