Electric grid baghdad

entered Iraq for the first time in 1917 where the first electric machine was installed in "Khan Dala" building. Prior to the Gulf War, the total installed generating capacity was 5,100 MW, which fell to about 2,300 MW after the Gulf War. Approximately 87% of the population had access to electricity. A combination of wars, sanctions, looting and vandalism has however, severely affected the entire power system infrastrucur...
