---

This paper presents a comprehensive examination of the integration of heat pumps and thermal energy storage (TES) within the current energy system. Utilizing bibliometric analysis, recent ...

This roadmap reports on concepts that address the current status of deployment and predicted evolution in the context of current and future energy ...

This integration supports the optimisation of the energy system to deliver decarbonised, reliable and resource-efficient energy services, at the ...

Characterization of a TES system includes storage media, storage containment, and heat exchange/transfer (i.e., the ability of the TES system to support power generation or heat sources for ...
