America's power grid faces rising demand, retiring baseload, and policy delays. Can utilities, investors, and tech solutions keep the lights on?

The Farewell is a 2019 American comedy-drama film, written and directed by Lulu Wang. It stars Awkwafina, Tzi Ma, Diana Lin, and Zhao Shuzhen. The film follows a Chinese American woman named Billi, who learns her grandmother (referred to as Nai Nai) has only a short while left to live. Wishing to see Nai Nai before she dies but also not wanting to reveal her fatal illness to her, Billi's family uses an impromptu wedding as a pretense to gather in their hometown. Throughout the preparation for the we...

Hello there, my sweet Caldwell County friends! It is your digital historian, Dot, ready to dust off the old ledgers, unroll the microfilm, and peek into the diaries of yesteryear! Today we are taking...

The program shows how a collapse of the power grid could be deadly -- and lead to life-threatening shortages of heat, food, and water if protective measures aren't taken.

November 3 - Microgrids are being developed across the U.S. as new data centers drive up power demand and companies and communities seek reliable power ...

Farewell to the Power Grid Microfilm

Author's note: The traditional definition of a microgrid specifies that the system can "island" from the grid, a requirement to provide power during grid outages, i.e. resilience. In this case, ...
