Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.

Immediately following the retirement and decommissioning of the Tunnel Jet peaking facility in 2023, FirstLight will work with New Leaf Energy to design, manage, and procure the new ...

The Tunnel Battery Energy Storage System (BESS) project, being developed in collaboration with New Leaf Energy, will replace the Tunnel Jet Gas Peaker, ...

FirstLight's Tunnel Battery Energy Storage System (BESS) project, being developed in collaboration with New Leaf Energy, will replace ...

Aviation energy storage specialist Electroflight has today announced the launch of a new COTS Energy Storage Unit, designed to advance prototype development in electric aviation projects.

Once completed, the 2,000 MW Bellefield project is expected to be the largest solar-plus-storage facility in the United States.

Covering about 200,000 square meters, the new energy storage project attracts a total investment of 1.45 billion yuan (\$200 million). Up to ...

The company will replace the Kerosene facility with a 17-megawatt cleaner, more efficient battery energy storage system. The new system still needs state permits and a connection agreement...

With an initial annual production capacity of 10,000 units, or roughly 40 gigawatt-hours of energy storage, this Megafactory is set to significantly contribute to Tesla's global energy storage ...

Owner Vistra Energy has announced the completion of work to expand its Moss Landing Energy Storage

First flight new energy storage development

Facility in California, the world's ...
