The expansive EV factories, towering wind turbines and sprawling solar arrays are symbols of China's enormous global lead in renewable energy and clean technology, some of the ...

NASA has published a new series of pictures of the Great Solar Wall, a giant cluster of PV power projects in Inner Mongolia's Kubuqi Desert.

The massive growth in wind and solar begs the question: why is China still building coal power plants and, by most analyses, way more than it actually needs? The answer is complicated.

From west Africa's Sierra Leone and Liberia to Kiribati and Tonga in the Pacific, the impact from China's rising dominance as the world's first ...

China is apparently deploying scarce solar assets irrationally, installing substantial numbers of solar panels in several renewables-poor ...

Aerial photographs show the 5GW farm's array of glinting solar panels extending over a vast, flat tract of land, human figures dwarfed like ants among ...

In China, more wind turbines and solar panels were installed last year than in the rest of the world combined. And ...

Photographer Chu Weimin has spent the past three years documenting China's clean energy transition using drones. His ...

An aerial view shows residential buildings with roof-mounted photovoltaic-solar panels in Yinchuan, in China's Ningxia Hui Autonomous ...

Foreigners look at China s solar power stations

China's solar ambitions are emblematic of its broader race toward a green energy future, driven in part by Beijing's interest in becoming less reliant ...
