-----

France's energy storage market is experiencing explosive growth, driven by the need to integrate intermittent renewables like solar and wind into its low-carbon grid.

France has opened a final public consultation for the third edition of its Multi-Year Energy Program (PPE) in a revised version that envisages cutting ...

The French government has published its latest energy roadmap for the coming years, setting a reduced target of 48 GW for solar PV by 2030.

Is storage the missing piece in France's power system? France's electricity system is at a turning point. Long anchored by nuclear and hydro, it now faces ageing assets and rapid solar ...

France's Energy Regulatory Commission (CRE) has announced a major policy overhaul, releasing new feed-in tariff (FIT) standards for rooftop PV systems under 500 KW for Q3 2025 (July ...

Others, including the renewable energy industry federations, signatories to the Solar Pact launched by the French government in 2024, have ...

France set out a new energy law after years of wrangling on Thursday which slashes its wind and solar power targets and drops a mandate for state-run firm EDF to shutter nuclear plants.

Looking beyond 2026, policies are expected to tighten further. Investors should closely monitor the upcoming CRE guidelines on storage ...
