One of the most significant obstacles of deploying GFM IBRs on the bulk power system (BPS) is establishing clear interconnection requirements regarding the expected performance, testing, ...

We test and certify energy storage systems in accordance with all relevant standards - including VDE, IEC, DIN and FGW - and carry out additional specialised certifications for battery storage.

Utilities will soon require new energy storage technologies, to back up wind and solar power, that can be warranted for 15+ years. To quickly determine whether a new technology can meet ...

To support consistent characterization of energy storage system (ESS) performance and functionality, EPRI--in concert with numerous utilities, ESS suppliers, integrators, and ...

This section of the report discusses the architecture of testing/protocols/facilities that are needed to support energy storage from lab (readiness assessment of pre-market systems) to grid ...

This report describes development of an effort to assess Battery Energy Storage System (BESS) performance that the U.S. Department of Energy (DOE) Federal Energy Management ...

We offer a comprehensive testing solution for energy storage systems. Fully intuitive and flexible loading, unloading, characterization and aging tests.

Using high-precision measurement technology and powerful climate, shock, and vibration systems, we test your battery under realistic ...

Our latest regenerative power supplies and battery emulation software let you test how inverters and control systems respond to dynamic load profiles, state-of-charge (SoC) shifts, and grid ...

Functional testing of new energy storage products

Bureau Veritas is your trusted partner for energy storage systems (ESS) and renewable energies throughout all stages -- from concept and design to testing, certification, and market approval.
