Gabon locks financial close for Plaine Ayeme: EUR 28m fuels 30-MW solar + 8 MWh storage, first step to 60 MW hybrid easing Libreville's peaks under 25-year PPA.

Our 120 MW natural gas thermal power plant project addresses the growing energy demand of the city of Owendo which is at the heart of Gabon's industrial fabric.

ENGIE Africa and its subsidiary AUSAR Energy are launching the construction of 8 hybrid solar power plants at remote sites in the Northwest, in partnership with the Caisse des D& #233;p& #244;ts et ...

PUE activities play an essential role for both off-grid electrification and rural economic development; they can stimulate demand for off-grid energy systems and indirectly enhance rural livelihoods.

As Gabon accelerates its renewable energy transition, battery energy storage systems (BESS) are emerging as game-changers. This article explores how BESS technology supports grid stability, ...

The project was commissioned in November 2017 by the Ministry of Energy, and since then, the communities have use off-grid solar electricity with ...

Speaking generally, small off-grid systems typically run 12 volts (a campervan or RV, for example). Higher voltage creates a more efficient system, with less electricity loss, so the bigger your system's ...

Unlike on-grid systems, off-grid solar systems provide a fully self-sufficient power supply, making them the go-to option for remote areas where traditional electricity access is scarce or unreliable.

At our WWF office in Gamba, Gabon, we've gone solar, installing 20 panels, lithium batteries, and backup systems to keep the lights on, even during grid cuts.
