The German company ABO Wind designs and develops systems for generating electricity from renewable energies. In 2023, a solar park was built in Bavaria. To ensure optimal use ...

The launch of these projects marks a major milestone in TotalEnergies' development of battery energy storage capacity in Germany, ...

Germany's grid-scale battery buildout is accelerating. Installed capacity hit 2 GW last quarter - and could reach 3 GW before the end of 2025. Growth remains ...

At the sites of the power plants in Hamm and Neurath, an intelligent, net-worked storage system is being built. Learn more about the project.

As the share of renewable energy in the power grid continues to grow, so does the need for efficient electricity storage. In 2024, battery storage ...

The storage sector grew by 50% in 2024, with 600,000 new systems installed, consolidating the country as a European leader in the energy transition. This growth is part of a ...

During the first six months of 2025, over 250,000 new battery storage systems began operation in Germany, adding nearly 2 GW of power and 3.55 GWh of capacity. Of this new capacity, ...

This is an extract from a recent report "EU Battery Storage Market Review 2025" published by SolarPower Europe. EU annual BESS installed capacity 2025 In 2025, battery storage ...

Battery storage systems in Germany surpassed 2 million by the end of July 2025, offering a total capacity of about 14,000 MW/ 22.5 GWh, according ...

Germany's new energy storage installations

A successful energy transition will require a variety of storage systems to absorb electricity during peak times and release it when needed -- for example in the evening and at night.
