So I'm new to GMRS and was just looking for some clarification. If I wanted a repeater and I had the frequency 462.675, that is the receive frequency correct? If that's true, I'm assuming ...

DSDPlus is not finding audio input devices on startup, only audio output devices ????? Any ideas how to fix it to find the audio input devices (the VB Cable Output device)?

Like I have both frequencies for the other county because I gotta off the radio reference scanner page. And I do have permission, I just need to know the difference between input and output ...

Hello, everyone, Without any changes on my end, DSD Plus suddenly stopped displaying the "audio input device". It still decodes, but there is no audio output to the speakers. I ...

Input is the repeater receive frequency and the user radio transmit frequency. Output is the repeater transmit frequency and the user radio receive frequency. In Baofeng radio menus: T-DCS is ...

Having issues piping audio from SDR# to DSD+ on my laptop. On my desktop, it works fine because DSD recognizes the VB cable as the only audio input source. On laptop, the laptop ...

I'm trying to program a Baofeng radio to match existing (commercial) radios, using CHIRP. But I don't understand what all the "tone" columns in CHIRP mean. Tone Mode, Tone, Tone Sql, ...

You should be able to follow the components from the "RF-Input" connector, through the relay, and to that transistor. One half of that relay switches the input and the other half switches the ...

Maybe dumb question, but I'm trying to program Dallas County Skywarn frequencies in my scanner and in the RR database there are Input and Output frequencies listed. Which do I program? ...

Just to clarify right away. I understand the difference between input and output frequencies, for the most part.

Input current of solar inverter

Recently I was parked across the street from the HQ of my City's ...
