**Solar Electricity Generation:** Solar electricity generation is the use of photovoltaic (PV) panels to convert sunlight into electricity for ...

Solar thermal power generation is a process through which solar power is collected by an array of parabolic dishes and transformed into steam through a heat exchange device to drive a ...

**Overview** **Development and deployment** **Potential** **Technologies** **Economics** **Grid integration** **Environmental effects** **Politics** The early development of solar technologies starting in the 1860s was driven by an expectation that coal would soon become scarce, such as experiments by Augustin Mouchot. Charles Fritts installed the world's first rooftop photovoltaic solar array, using 1%-efficient selenium cells, on a New York City roof in 1884. However, development of solar technologies stagnated in the early 20th centu...
