Minister Moyo disclosed this at the Soti-Source resettlement area in Gutu, where he commissioned a 160-kilowatt solar power project financed by the Government through the Rural ...

"I first learned about the solar powered system through radio and TV adverts," Mr. Mwayogwe said. "Even though I have grid power, I decided to buy the solar system because of frequent blackouts in ...

The electricity generation landscape continued to be dominated by hydroelectric plants with a share of 82 percent. Coal power plants and solar plants also ...

"Since 2002, our solar and biogas-powered models have reached rural institutions kept in the dark. This mini-grid adds to our record, bringing power to classrooms, clinics, and homes.

The floating solar power plant is a groundbreaking solution that utilises photovoltaic modules on water bodies, optimising land use while ...

It is unlikely that power-to-power applications of hydrogen show high potential in Zambia, as these applications still fail to provide a positive business case in the rest of the world.

Against this grim backdrop, solar power has emerged as a lifeline. Zimbabwe receives over 3,000 hours of sunshine each year, with solar ...

Despite these advantages, major impediments like the high initial cost of installing solar systems and the lack of technical support in-country ...

Solar mini-grids are considered the most viable solution to provide access to clean electricity to this huge population. A number of solar mini-grids (SMGs) have been developed in ...
