Renewables developer Ameresco will design and build a microgrid for a California community utility. McKinleyville Community Services District selected Ameresco to plan, design, ...

These DER systems will typically include generation and storage capabilities with advanced microgrid controls that support island operation in the event of a loss of grid services.

This project upgraded a wastewater treatment plant to use a microgrid with a solar photovoltaic system, energy storage, and a microgrid controller for increased resiliency and to ...

Clean energy microgrids and battery energy storage systems (BESS) are vital energy solutions as wastewater treatment system operators aim to boost resiliency, decarbonize operations, reduce ...

Start with expert collaboration. Our team has been delivering successful onsite energy solutions for over 65 years. Let's work together to build a BESS that meets your unique needs.

Battery energy storage systems (BESS) are increasingly being considered by water and wastewater utilities to capture the full energy potential of onsite distributed energy resources (DERs) and achieve ...

Ideal for microgrids, rural and remote areas, large-scale manufacturing, farms, and EV charging stations, the FlexiO series is a highly integrated battery energy ...

The Laguna Wastewater Treatment Plant (LTP) microgrid project demonstrated an advanced microgrid at a large wastewater treatment facility that would provide increased reliability and resilience.

The FlexiO series is a highly integrated battery energy storage system (BESS) designed to optimize

Large-scale microgrid energy storage battery cabinet for wastewater treatment plants

performance and reduce costs for stationary commercial and industrial energy storage applications.

ELM MicroGrid delivers scalable Battery Energy Storage Systems (BESS) starting at 100kW and powering projects up to 100MWh and beyond.
