-----

Repsol's Lava Run LLC wind & solar projects have been scouting this area and "courting" the State of Arizona and its officials for a few years. They have plans ...

These devices play a crucial role in bridging solar power generation with energy storage solutions, especially when paired with lithium batteries. This ...

It can be widely used in application scenarios such as industrial parks, community business districts, photovoltaic charging stations, and substation energy storage.

Powered by a new thermodynamic cycle: LAVA's liquid-based isothermal technology converts heat into power and power into heat at near-perfect efficiency, delivering superior returns with rapid payback.

Additionally, there are several other wind and solar projects proposed near the project. A project of similar size and capacity (1,500 MW), Taurus Wind, would be directly west of Lava Ridge.

About the Company Founded in 2020 by Doron Tamir, a veteran energy entrepreneur with a proven track record in developing utility-scale solar energy projects, and Professor Carmel Rotschild, a ...

What if electricity came from lava? ?In the near future, scientists have discovered a way to convert the immense heat of volcanoes into endless clean energy...

Repsol Renewables is developing a 500 megawatt (MW) wind and a 450 MW solar project in Apache County, Arizona. Once operational, the projects would ...
