NLR researchers actively publish their latest scientific findings and breakthroughs in technical reports, journal articles, conference papers, patents, presentations, and more. Access ...

Specifications in design and equipment during the procurement process can help prevent vulnerabilities and support the development of a long-lasting system. This page outlines key considerations to ...

In this regard, this study proposes a procurement auction scheme for long-term photovoltaic (PV) energy contracts based on mechanism design theory. We developed a two ...

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be ...

The 30/42/60kWp Foldable Photovoltaic Container All-In-One integrates high-efficiency PV modules, intelligent energy storage, and modular power management into a single container.

The goal of this guide is to reduce the cost and improve the effectiveness of operations and maintenance (O&M) for photovoltaic (PV) systems and combined PV and energy storage systems.

A total of 151 project proposals were submitted in Bulgaria's standalone energy storage procurement procedure named RESTORE, which is seeking to support the construction and commissioning of ...

This paper delineates the design of a containerised electrical energy storage system capable of providing energy derived from a retractable photovoltaic (PV) panel system.

Here we assess the cost savings from a globalized solar photovoltaic (PV) module supply chain. We develop a two-factor learning model using historical capacity, component and input material...

Long-term procurement of photovoltaic containers for field research

This paper presents a review and assessment of public-policy options for supporting large-scale penetration of photovoltaics (PV) in the United States.
