The authors of this paper have recently proposed a Harmonic Power-Flow (HPF) method that accurately represents the AC power flows including the coupling between different harmonics.

Key contributions include enhanced harmonic compensation, frequency instability mitigation, and faster response times, highlighting the ...

To design a Micro grid system using solar PV/wind/energy storage system like battery and power quality analysis i.e. reduction of harmonics and ...

This repository comprehends a Matlab project for the Harmonic Power-Flow (HPF) calculus in power systems with a high share of Converter ...

a comprehensive review of harmonic mitigation methods from hierarchical control view-point. The control strategies proposed to mitigate harmonics are classified into three groups; Primary, ...

For this reason, this study proposes a method for PFC considering the harmonic power based on the models for the microgrid ...

Through this formulation it is possible to calculate the harmonic power flow independently of the fundamental power flow, which is an advantage when working with ...

This article presents a new methodology to determine interval solutions associated with the harmonic power flow of microgrids using the Taylor series expanded until the second ...

Abstract The purpose of this paper is to study the harmonic behavior of hybrid microgrids (MGs). To achieve the desired goal, a modified active power filter (MAPF) and a ...

In this paper, a review of power flow and short-circuit analysis algorithms for MG systems under two different modes of operation, grid ...
