Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have ...

High-energy density battery packs engineered for extended flight times and rapid deployment. Our products offer robust, high-performance power solutions suitable to power a variety ...

Merus Power delivered the first grid forming battery energy storage systems in the Nordics last year. The grid forming BESS to be deployed in Lapland is also designed to withstand ...

"Think of supercapacitors as the sprinters of energy storage," says Dr. Lena Fjellström, project lead at Nordic Energy Research. "They're not here to replace marathon-runner batteries, but ...

The energy density of the best batteries today is 260 Wh/kg = 0.93 MJ/kg (Flux Power 2020), whereas diesel fuel has 43.2 MJ/kg (Engineering ToolBox 2008). Most of the batteries we use today are ...

Merus Power manufactured and delivered the first grid forming energy storage facilities in the Nordic countries to Valkeakoski and Lappeenranta last year. Merus Power is responsible for the ...

The Nordic region benefits from large hydro reservoirs that provide excellent and cost-effective energy storage options, which are already being efficiently utilised.

You know, when people talk about European energy storage, Germany and Sweden usually steal the spotlight. But here's the thing - Finland's quietly been building a world-class battery ecosystem that's ...

Meta Description: Explore how Nordic countries lead in exporting advanced energy storage batteries, supporting renewable integration and grid stability. Discover market trends, case studies, and why ...
