On average, a solar panel system with Octopus costs between £5,000 and £9,000. That includes installation and VAT. Adding a battery can cost an extra £2,000 to £3,500, depending on the size.

As of 2025, the typical prices are: All packages include VAT and standard installation. Larger systems and additional battery capacity are available with ...

Sadly, I know of no companies that offer 0% financing over 3 years, as this cost is typically passed on to the customer via a higher system quote (as Octopus appears to have done).

We had our system installed last year and are looking at 7 years payback for the solar, and 10ish years for the batteries - our monthly payment is now around £67 (large 4 bedroom semi detached), ...

We've compared the cost of solar panels, installation process, and warranty terms against other leading providers to help you find the best solar panel installers in the UK.

The cost of installation can depend on how many panels you need, whether you choose to have battery storage, and what size of battery you require. The cost ...

Our in-depth review examines whether Octopus Energy, the fast-growing utility giant, provides a compelling solar panel proposition for UK households. We compare costs, the installation ...

Are Octopus solar panels worth it for your home? Our experts look at pricing, warranties, and service compared with the best UK solar panel installers.

Octopus offers clear pricing as follows: Panel-only installations start at £6,163 (for two panels). A 10-panel system with a 5 kWh battery (most popular) is quoted at £8,477 (essential battery) or ...
