From loadshedding relief to load shifting, and from rooftop solar to utility-scale breakthroughs, the Solar & Storage Volume 2025 offers a ...

A report shows that Africa has emerged as the world's fastest-growing solar market even as global growth slowed last year, driven by a 60% surge in imports of solar panels from China.

Billed as the nation's first and Africa's largest off-grid renewable energy system, the Cazombo Photovoltaic Park has been designed to rely on ...

Africa installed a record 4.5 gigawatts (GW) of photovoltaic (PV) solar power capacity in 2025, according to the Global Solar Council, which marked a 54% jump from the year before.

Africa's energy storage market has seen a boom since 2017, having risen from just 31MWh to 1,600MWh in 2024, according to trade body AFSIA ...

As in previous years, Africa's PV market activity in 2024 was heavily dominated by two countries, South Africa and Egypt, which saw 1.2GW and 707MW of new additions, respectively.

Africa's energy storage revolution isn't coming--it's already here. From Nigerian mini-grids to South African battery wars, the continent is rewriting its energy script.

A global 3-day conference with over 200 speakers covering the latest trends, market disruptors and technologies shaping the energy sector. From keynote ...

In our ongoing Spotlight series on battery energy storage, we now turn our attention to Africa. While attempting to cover this vast continent in a ...
