Find up-to-date statistics and facts on the global solar photovoltaic industry.

Solar energy installation is increasing owing to rapidly growing energy demand from various sectors. A positive outlook for clean energy deployment and an encouraging regulatory ...

The region's solar PV panels market is expanding quickly because of encouraging government regulations and rising demand for renewable energy ...

Global capacity for manufacturing wafers and cells, which are key solar PV elements, and for assembling them into solar panels (also known as modules), ...

The solar PV panels market is growing rapidly as global electricity ...

In Q3 2025, the residential segment installed 1,088 MWdc of solar capacity, declining 4% year-over-year and quarter-over-quarter. Despite an industry rush to bring projects online this year to ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates ...

The global Solar Panel Market size is expected to reach USD 387.2 Billion in 2034 registering a CAGR of 8.9%. Our report provides a comprehensive overview of the industry, including ...

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive ...

The Asia Pacific solar PV market is projected to grow at a CAGR of more than 9.3% from 2025 to 2034, driven by strong policy support, falling technology costs, rapid advancements in energy storage ...
