The Solar Energy Industries Association (SEIA) is leading the transformation to a clean energy economy. Learn more at [seia](https://seia.org)

On Tuesday, the US Energy Information Administration released full-year data on how the country generated electricity in 2025. It's a bit of a good news/bad news situation. The bad news is ...

OverviewSolar PV nameplate capacityCurrent statusHistory of leading countriesHistory of market developmentSee alsoExternal linksBetween 1992 and 2023, the worldwide usage of photovoltaics (PV) increased exponentially. During this period, it evolved from a niche market of small-scale applications to a mainstream electricity source. From 2016 to 2022, PV has seen an annual capacity and production growth rate of around 26%, doubling approximately every three years.

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive ...

Here we provide a global inventory of commercial-, industrial- and utility-scale PV installations (that is, PV generating stations in excess of 10 kilowatts nameplate capacity) by using a...

This review examines the evolution, current advancements, and future prospects of PV systems, highlighting the development of various photovoltaic cell technologies, including crystalline ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

Discover the fascinating history of solar panels, from their invention and early inefficiency to their popularization in the 1970s and mass production in the 2000s.

pv magazine's global monthly edition offers authoritative reporting, market-driven analysis, and expert perspectives on the technologies, policies, ...

Popularization of photovoltaic panels

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...
