Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

The Portuguese government plans to invest up to 400 million euros (\$466 million) to improve grid management and boost battery storage following ...

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader EUR400 million package ...

Portugal and Moldova have moved forward with battery energy storage system (BESS) procurements with funding from the EU and USAID.

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy storage ...

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January, as part of a broader EUR400 million package aimed at improving grid

Portugal has selected 43 winning BESS projects for a share of EUR100 million (US\$105 million) in EU grants while, on the other side of Europe, Moldova has launched a 75MW BESS ...

Portugal has awarded more than 500 MW in its first large-scale storage auction, marking a milestone in its energy transition. However, the requirement that at least 75% of battery charging ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Earlier this year, the Portuguese government announced the outcome of an energy storage tender that will see the installation of 500 MW of ...
