ObjectiveIntroductionMaterials and EquipmentGlobal GoalsRelated LinksSolar cells (or photovoltaic cells) are devices that can generate electricity directly from sunlight. You may have seen arrays of solar cells on a roof in your neighborhood, or perhaps a much smaller array powering an emergency phone along a highway. In this project you will investigate how power output from a solar cell changes with temperature. See more on sciencebuddies Open Library Publishing PlatformChapter 1: Introduction to Solar Photovoltaics - Solar ... This chapter provides a comprehensive overview of the key principles underlying PV technology, exploring the
