-----

It will use the data from the Solax inverter via RS485 and I start the inverter monitoring in the morning using a real time clock module. ...

The benefits of a &quot;compatible battery&quot; sound lovely, but I'm going to consider that it might be outa my league on price and my level of solar maturity. Maybe I'll just stick with entry ...

The SMA RS485 Module enables SMA inverters to establish wired RS485 communication. The RS485 Module must only be installed in the following SMA inverters: o STP 50-40 (Sunny ...

I know I found quite a lot of information around the forum advocating minimalmodbus and doing the data collection which was ...

The RS485 board allows creating a BUS to connect multiple photovoltaic inverters, enabling centralized monitoring via Datalogger.

In the case of trouble scanning for all inverters, please check the RS485 wiring for voltage and polarity: The voltage across RS485A+ and RS485B- should be between 3 and 4.6 VDC

Edit 31st October 2022: This custom\_component has started to become a Universal Solar Inverter over Modbus RS485 / TCP Integration. Supporting Multiple brands of Inverters.

Two of the most widely used protocols in the solar + ESS ecosystem are CAN (Controller Area Network) and RS485.
