Solar power is the most spectacular of China's clean-energy game changers; its fruits can be seen all around the world and at every scale, from ...

In short: China is installing record amounts of solar and wind, while scaling back once-ambitious plans for nuclear.

Located in remote Qinghai province, with a total installed capacity of 2.2 gigawatts, it is China's largest and world's 2nd largest solar plant. The development plan of the project was divided into 5 phases ...

Wooderson Solar Development Co has secured federal environmental approval for a 450MW solar PV power plant in Australia.

March 17 (SeeNews) - Chinese solar plants developer Maoneng Group, former Zhenfa Energy Group Co Ltd, officially initiated the construction of the 13-MW Mugga Lane solar park in the Australian ...

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic ...

China has been installing solar panels far faster than anywhere else in the world, and the investment is starting to pay off.

This energy did not flow to Canberra directly, but simply went into the national grid to offset the ACT's former reliance on coal-powered electricity.

China's largest back-contact (BC) solar power plant has officially been connected to the grid. The 500 MW Dalate Banner project in Inner Mongolia is powered entirely by LONGi's HPBC 2.0 ...
