-----

Looking ahead? We're prototyping solid-state batteries for ultra-fast EV charging - imagine recharging a delivery truck in 12 minutes!

Solid-state batteries spark a global EV arms race as automakers and startups compete to unlock ultra-fast charging and the holy grail of electric mobility.

Changan announced its "Golden Bell" solid-state battery with an energy density of 350-500 Wh/kg, allowing for lighter battery weight with greater energy storage capacity. According to ...

Gotion and BASF team up to accelerate solid-state batteries. Gotion's Gemstone pilot line already yields over 90% at 300 Wh/kg and targets mass EV use by 2030.

That's exactly what the Minsk Energy Storage Plant achieves through its cutting-edge battery systems. As Belarus' first utility-scale energy storage project, it's become the poster child for ...

At CES, Donut Lab presented a solid-state battery allegedly ready for mass production. However, the impressive specifications prompted critics to question the results. Donut has now ...

Farasis Energy, backed by Mercedes-Benz, announced on July 21 that its solid-state battery development has entered the pilot production and delivery phase, as reported by IT-Home. ...

Experts still have big questions--about cycle life and performance at the pack level. Donut Lab is releasing more evidence of its solid-state batteries, but there's no word on the chemistry just yet.

Technology company Donut Lab has published the results of the first measurements analysing the features of its solid state battery. The tests, conducted by Technology Research Centre ...

Donut Lab's solid-state battery sure looks like the savior for electric cars.
