The Port of Helsinki has built a new onshore power connection for the Stockholm traffic at the Olympia Terminal berth. It is estimated that this OPS facility makes it possible to reduce the climate emissions ...

It is designed to enable simultaneous shore power connections to five berths in the container terminal and two in the car terminal, with each output ...

Sweden's Port of Helsingborg is planning to build and inaugurate its first onshore power supply (OPS) facility for container vessels, in line with the ...

The Port of Helsingborg in Sweden is set to launch an onshore power supply facility for container ships in 2026, becoming the first port in Scandinavia to offer shore power for boxships.

Port of Helsingborg to Launch First Onshore Power Supply for Container Ships Sweden's Port of Helsingborg is set to make a significant stride toward sustainability with the planned launch of ...

Ports are not normally equipped to supply vessels with electricity from the shore, nor are vessels usually equipped for this. Instead the energy required is generated by the vessels' own auxiliary engines, ...

As part of the project, ABB will collaborate with Processkontroll Elektriska to provide the necessary infrastructure to supply electrical power to a large number of Stena Line vessels using the port.

Shore power is increasingly being adopted by ports, especially in Europe, and allows ships to plug into land-based electricity sources instead of running diesel generators while berthed, thereby reducing ...

With commissioning planned for autumn 2026, container vessels will be able to connect to electricity at berth in the Container Terminal using OPS technology. "Becoming the first Port in ...
