OverviewGas powerConsumptionHydro powerOil powerNon-hydro renewablesGlobal warmingPower stationsA newly built gas power plant is debated to cover future power shortages during the winter. There are considerations regarding a gas turbine testing facility in Birr AG belonging to the Italian engineering firm Ansaldo Energia. The facility is connected to both the gas and the electricity grid, and when both installed turbines are running, it feeds 740 megawatts into the Swiss electricity grid. In 2021, the contribution of natural gas to electricity generation was minimal, accounting for just 0.8% ...

The primary target group for the project are Swiss decision-makers who want to learn about these technologies and how they can impact their businesses in the future.
