-----

This work introduces a modeling guideline for supercapacitors for real-time simulations, proposing a tradeoff between the model accuracy and the required computational ...

This study presents a method to model supercapacitors in both time and frequency domains using a dynamic equivalent circuit model with a continuous distribution of time ...

Supercapacitors are energy storage devices with high electrical power densities and long spanlife. Therefore, supercapacitor-based energy storage systems have been employed ...

Instead of collecting voltage and current waveforms from a real supercapacitor, this example generates voltage and current waveforms by ...

You are cordially invited to participate in the 8th International Conference on Advanced Capacitors (ICAC2025), to be held in Ming Chi University of Technology, New Taipei City, Taiwan from ...

The supercapacitor model is simulated in this study by using MATLAB/Simulink, and the efficiency of the model is improved by verifying and evaluating the parameters.
