-----

We have made it easy to find the perfect adhesive tape solution for your solar panel needs. Whether you're mounting flexible or rigid panels, our product finder helps you navigate through various ...

The edge protection tape makes the frameless PV module a beautiful appearance, reduce the damage rate of the module, seal, and prevent water seepage or ...

DyMat E is a transparent adhesive composed of EVA used to fix components such as cells, strings etc., during the manufacture of photovoltaic modules.

Strips or rolls of carrier material coated with single or double-sided adhesive flanked sometimes by removable liners. Tapes are used to attach or arrange materials to each other or in relation to each ...

Ideal for lamination, cell interconnection, and surface protection in solar production processes. Our High Temperature Tape for Photovoltaic Applications is designed for superior heat resistance and long ...

Photovoltaic tapes for the renewable energy market for bonding, venting, insulation, protection & masking. Custom rolls & die-cut shapes available.

At Saint-Gobain, our expert Photovoltaic Tape and Solar Cell Tape solutions can solve the most demanding applications and challenges in your Energy Market.

In solar panel manufacturing, BOPP Solar Tape for Lamination is a specialized adhesive film used to secure solar cells during lamination. It ensures ...

Trusted by PV module manufacturers for more than 20 years, this solar edge seal tape protects cells, connections and transparent conductive oxide coatings from moisture ingress, helping ...
