The top five countries are China, United States, India, Japan, and Germany, based on solar power generation and installed capacity. Emerging leaders include Brazil, Australia, and Spain, ...

Data and analysis including a list of solar power in every country in ...

Discover the top countries with the most solar power installed in 2025. Explore global solar growth trends, annual installation rates, and how ...

Notably, China is currently leading the way in solar photovoltaic (PV) generation, with its total installed capacity surpassing 1,100 gigawatts (GW) as ...

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well ...

This treemap chart shows the state of the world's solar photovoltaic (PV) installations as of 2024, broken down by region with the top 15 countries ...

At the link below you can find a detailed description of the structure of our data pipeline, including links to all the code used to prepare data across Our ...

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This graphic visualizes the top 15 countries by cumulative ...

China installed up to 357.3 GW, accounting for almost 60% of new global capacity. Outside China, 244.6 GW

The latest ranking of countries in photovoltaic panel power generation

were added, led by the European Union (62.6 GW), ...
