In a strategy that acknowledges both of these maxims, Uruguay has, according to Forbes, divorced its energy mix from fossil fuels while saving ...

One such story is unfolding in Uruguay, a small South American country that has quietly become a world leader in renewable energy. In just over a decade, Uruguay went from being almost completely ...

Uruguay did what most nations still call impossible: it built a power grid that runs almost entirely on renewables--at half the cost of fossil fuels. The ...

In 2024, Uruguay generated 99 percent of its electricity from renewable sources using hydropower (42 percent), wind (28 percent), and biomass (26 percent). Solar and fossil-based ...

With an electricity mix fed by approximately 94% renewable sources, Uruguay is already a decarbonisation pioneer. But while 46% of those sources are hydropower, 27% comes from the wind ...

To ensure this mix remains as clean as possible in the face of growing electricity demand, the next phase of Uruguay's energy transition is about to begin: major ...

Wind farms sprouted across the Pampas, Uruguay modernized hydropower dams, and solar energy began feeding the grid, with significant potential for further scaling up of photovoltaic ...

From wind turbines across open plains to solar panels soaking up the sun, Uruguay's energy transformation is a story of vision, courage, and ...

After successfully completing an initial transition that transformed its electricity mix into one of the cleanest in the world, Uruguay is now advancing into a second phase focused on ...
