Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

On Tuesday, the US Energy Information Administration released full-year data on how the country generated electricity in 2025. It's a bit of a good news/bad news situation. The bad news is ...

Electricity generation from solar, measured in terawatt-hours.

Below, you can find resources and information on the basics of solar radiation, photovoltaic and concentrating solar-thermal power technologies, electrical grid systems integration, and the non ...

PVGIS is a free web application that allows the user to get data on solar radiation and photovoltaic system energy production, in most parts of the world.

Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2025, utility-scale ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

Watch live while our E.W. Brown Solar Facility generates power. Learn more about its capabilities. Access comprehensive historical generation data. A measure of ...
