From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and ...

Fourteen large battery storage systems (BESS) have come online in Sweden, deploying 211 MW/211 MWh for the region. Developer and optimiser Ingrid Cap...

As Europe's battery energy storage system (BESS) market rapidly expands, battery capacity has now surpassed 20 GW. While Norway once set ambitious goals to become the leader ...

The 1-hour duration BESS project, called Isbillen Power Reserve, will be the largest in Sweden and the largest in the Nordics by megawatt (MW) power.

You know, when people talk about European energy storage, Germany and Sweden usually steal the spotlight. But here's the thing - Finland's quietly been building a world-class battery ecosystem that's ...

The Nordic region benefits from large hydro reservoirs that provide excellent and cost-effective energy storage options, which are already being efficiently utilised.

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW ...

BESS stores excess energy generated during favorable conditions and releases it during low generation periods, aiding in grid balancing and supporting renewable integration.

Energy storage, and in particular batteries, offer a flexible and scalable solution. By charging when electricity is abundant (for instance, during windy nights) and discharging during ...
