Discover all statistics and data on Renewable energy in Greece now on statista !

PVGIS is a free web application that allows the user to get data on solar radiation and photovoltaic system energy production, in most parts of the world.

Under Greece's revised National Energy & Climate Plan (NECP) from last year, the government foresees 13.4 GW installed PV capacity by 2030. That is almost double the 7.7 GW target that was ...

The largest photovoltaic park in Europe with bifacial panels is inaugurated in Greece. The solar farm (see photo) located near Kozani, ...

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power ...

Explore the solar photovoltaic (PV) potential across 89 locations in Greece, from Drama to Ierapetra. We have utilized empirical solar and meteorological data ...

Listed below are the five largest upcoming Solar PV power plants by capacity in Greece, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than EUR500 million in the Greek 'Operator of Electricity Market' RES fund. To reduce that deficit...

In 2023, Greece ranked first in Europe in terms of the percentage of domestic electricity produced by

Where are the photovoltaic sites in Greece

photovoltaics, with a percentage more than double the EU average (8.6%) and more than three ...

Solar resource and PV power potential maps and GIS data can be downloaded from this section. Maps and data are available for 200+ countries and regions. ...
