Overview Government action Solar manufacturing industry See also External links The Japanese government is seeking to expand solar power by enacting subsidies and a feed-in tariff (FIT). In December 2008, the Ministry of Economy, Trade and Industry announced a goal of 70% of new homes having solar power installed, and would be spending \$145 million in the first quarter of 2009 to encourage home solar power. The government enacted a feed-in tariff in November 2009 that requires utilities to purchase excess solar power sent to the grid by homes and businesses and pay twice the st...

As a leading global CRDMO, with over 12,000 skilled employees in the United States, Ireland, Germany, China and Singapore, WuXi Biologics provides an ...

Solar energy represents the largest energy-producing renewable energy source in the country. In fact, solar power stations had the highest number of renewable electric power plants on ...

TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations.
