Zambia is self-sufficient in all its energy sources with the exception of petroleum, which contributes about 9% to the national's total energy requirements, ...

Summary Overview Hydroelectricity Thermal power Oil and natural gas Renewable energy External links Zambia is potentially self-sufficient in sources of electricity, coal, biomass and renewable energy. The only energy source where the country is not self-sufficient is petroleum energy. Many of the sources of energy where the country is self-sufficient are largely unexploited. As of 2017, the country's electricity generating capacity stood at 1,901 megawatts.
